

MRI Stillness Game

Train patients to be still and calm

MRI Stillness Game

“This game is a first of a kind application that enables patients to remain still and calm, and helps increase our facility throughput.”

— Matthew Hall, MD
Radiation Oncologist, Miami Cancer Institute

Problem

MRI provokes anxiety, fear, claustrophobia, and discomfort. **Patients of all ages struggle to be still** during MRI. **Procedures last longer** when sequences need to be repeated, or even rescheduled.

Solution

A self contained, easy to use, **interactive VR game** to prepare for MRI with a reduced need for sedation.

Founders

Dr. Leonard Sender

Oncologist, immunotherapy visionary, and champion for Adolescents and Young Adults with cancer.

Roger Holzberg

Former Disney Imagineer, Creative Director of the National Cancer Institute, and cancer survivor/health innovator.
