

Radiation Easy

Acclimate through play

“In a similar study the median age of sedation was reduced from 10 to 3.5 years old.”

— Deb Wagers, MHA, CCLS

Problem

Radiation Therapy provokes **anxiety, fear, claustrophobia, and discomfort**. Anxious patients often need repeated sedation to complete their therapy.

Solution

Patients explore via computer or VR and experience being in either Total Body or LINAC Radiation at their **own comfort level**, guided by the clinician, to reduce the need for sedation.
